

Stream	Anticipated Updates to Standards and Technical Documents
Structures (STR)	The procedure for the Technical Acceptance of Road Structures on Motorways and other National roads is currently being reviewed with a view to publishing the revised procedures later this year.
Geometry (GEO)	<p>The current Guidance on Minor Improvements to National Roads is to be update to outline the requirements for a preliminary design report for National Road Schemes in an urban setting. The inclusion of guidance in relation to retrofitting of existing National Road junctions within this document is also being considered.</p> <p>These documents are scheduled for publication in Q3 2017.</p>
Pavement (PAV)	<p>Technical documents are being developed for the use and approval of Crack Sealing and Joint Repair Systems. These documents are scheduled for publication in early 2018 pending the completion of industry consultation.</p> <p>A review of possible improvements to the current pavement design methodology within TII Publications is currently being undertaken; no publication date has been set for any potential revised documentation as of yet.</p>
Roadside Equipment (REQ)	The safety barrier and bridge parapet design documents are currently being reviewed with the intention of combining the two documents to become a single design document for Vehicle Restraint Systems. Various other technical items within the existing standards and specification are also being reviewed. The associated documentation is scheduled for publication in Q3 2017.
Project Management Guidelines (PMG)	The Project Management Guidelines are currently being updated to meet the operational needs of TII. A guideline document is being developed which will provide an overview of the project management process implemented by TII and is due for publication in Q3 2017.
Safety(STY)	The road safety publications associated with the EU Directive on Road Infrastructure Safety Management have been in use now for several years. These documents are currently being updated based on the experience of implementing these documents since their initial publication. The revised documents will be published in 2017.
Lighting (LHT)	The requirements for road lighting on National Roads are being reviewed so as to inform any updates to the associated design standards and specification. Current practices for energy efficiency will be incorporated with a view to publishing in late 2017.

Stream	Anticipated Updates to Standards and Technical Documents
Earthworks (ERW)	Guidance in relation to Geotechnical Risk Management is currently being developed for publication within the TII Publications system later in 2017. Guidance in relation to Geotechnical Asset Management is also being considered with a view to publication in early 2018.
Requirements for Measuring and Pricing (RMP)	An updated version of the Library of Standard Item Descriptions in line with the current RMP documents is being prepared for issue as a TII Publication.
