

The following Transitions have been independently assessed in line with the requirements of DN-REQ-03081 as having undergone appropriate testing to meet the requirements of ENV 1317 - 4 and have been accepted for use on the Irish National Road Network for the Containment Performance Class and Working Width Class stated below.

The Transition shall comply with the manufacturer's specification, component descriptions and Installation procedures. Further information on Impact Severity Levels for the product and copies of documents and drawings can be obtained from the Supplier.

Essential characteristic information only is provided and confirmation is required that the system selected complies fully with all TII contractual conditions and requirements as detailed in TII Publications and any contract specific or site-specific documentation. Installers shall have successfully undertaken suitable training for the system to be installed.
