# Notes for Guidance on the Method of Measurement for Road Works Series MMNG 200 - Site Clearance

**CC-GMP-00200**

March 2000

## About TII

Transport Infrastructure Ireland (TII) is responsible for managing and improving the country's national road and light rail networks.

## About TII Publications

TII maintains an online suite of technical publications, which is managed through the TII Publications website. The contents of TII Publications is clearly split into 'Standards' and 'Technical' documentation. All documentation for implementation on TII schemes is collectively referred to as TII Publications (Standards), and all other documentation within the system is collectively referred to as TII Publications (Technical). This system replaces the NRA Design Manual for Roads and Bridges (NRA DMRB) and the NRA Manual of Contract Documents for Road Works (NRA MCDRW).

## Document Attributes

Each document within TII Publications has a range of attributes associated with it, which allows for efficient access and retrieval of the document from the website. These attributes are also contained on the inside cover of each current document, for reference. For migration of documents from the NRA and RPA to the new system, each current document was assigned with new outer front and rear covers. Apart from the covers, and inside cover pages, the documents contain the same information as previously within the NRA or RPA systems, including historical references such as those contained within NRA DMRB and NRA MCDRW.

## **Series 200: Site Clearance**

### **1 Obstructions Above Ground Level**

The various Group I, Feature 3 items of site clearance measured separately are to be referenced on the site clearance drawings and listed in Appendix 2/1.

The referencing of items for site clearance can include consolidated references such as - "a house with adjoining garage and outbuildings" provided that full identification is given in, or cross referenced in, Appendix 2/1.

### **2 Take Up or Down**

Take up or down and set aside for re-use should only be used for those materials or items that are required to be stored on Site by the Contractor prior to re-use. Take up or down and remove to store off Site is appropriate to those materials or items which are required to be taken off Site to a store designated and described in the Contract. These requirements should be detailed in Appendix 2/3 of the Specification including the distance to the store.

### **3 Damage to Items**

Item coverage includes for replacing items damaged in the process of taking up or down and setting aside or storing. It is the Contractors responsibility to ascertain at the time of tender the extent of any damage which may occur and to make the appropriate allowance in his rates and prices.
