

Series 300: Fencing

1 Temporary Fencing

The Specification requires the Contractor to erect temporary fencing in all situations where he does not provide permanent fencing immediately. To comply with the Specification, Health and Safety Regulations and the Conditions of Contract the Contractor has the choice of a range of specified types of fencing. This temporary fencing is not shown on the Drawings nor is it included in the Bill of Quantities. However, should some specific temporary fencing be required by the Engineer then this should be shown on the Drawings and included in the Bill of Quantities.

2 Concrete Foundations or Longer Posts

Items are provided in the MMRW for concrete footings to timber posts. These are only measured where such a requirement is identified in Appendices 1/15 or 3/1 of the Specification.

Footings in all other circumstances, including those for all posts other than timber, shall be deemed to be included within the fencing item to which they relate.

Locations where longer posts are required should also be identified in Appendices 1/15 or 3/1, a specific Type reference should be given, and reference made in item descriptions.
