Notes for Guidance on the Method of Measurement for Road Works Series MMNG 400 - Road Restraints Systems (Vehicle and Pedestrian)

CC-GMP-00400

March 2016

About TII

Transport Infrastructure Ireland (TII) is responsible for managing and improving the country's national road and light rail networks.

About TII Publications

TII maintains an online suite of technical publications, which is managed through the TII Publications website. The contents of TII Publications is clearly split into 'Standards' and 'Technical' documentation. All documentation for implementation on TII schemes is collectively referred to as TII Publications (Standards), and all other documentation within the system is collectively referred to as TII Publications (Technical).

Document Attributes

Each document within TII Publications has a range of attributes associated with it, which allows for efficient access and retrieval of the document from the website. These attributes are also contained on the inside cover of each current document, for reference.

TII Publication Title	<i>Notes for Guidance on the Method of Measurement for Road Works Series MMNG 400 - Road Restraints Systems (Vehicle and Pedestrian)</i>
TII Publication Number	<i>CC-GMP-00400</i>

Activity	<i>Construction & Commissioning (CC)</i>
Stream	<i>Guidance for Measuring and Pricing (GMP)</i>
Document Number	<i>00400</i>

Document Set	<i>Standards</i>
Publication Date	<i>March 2016</i>
Historical Reference	<i>Series MMNG 400</i>

TII Publications Website

This document is part of the TII publications system all of which is available free of charge at <http://www.tiipublications.ie>. For more information on the TII Publications system or to access further TII Publications documentation, please refer to the TII Publications website.

TII Authorisation and Contact Details

This document has been authorised by the Director of Professional Services, Transport Infrastructure Ireland. For any further guidance on the TII Publications system, please contact the following;

Contact: Standards and Research Section, Transport Infrastructure Ireland
Postal Address: Parkgate Business Centre, Parkgate Street, Dublin 8, D08 DK10
Telephone: +353 1 646 3600
Email: infoPUBS@tii.ie

***SERIES 400:* ROAD RESTRAINT SYSTEMS (VEHICLE AND PEDESTRIANS)**

1 Safety Barrier

The MMRW provides for three categories of curvature of safety barriers for payment purposes. Curves which are made up of individual straight lengths of beams should not be considered to be small lengths of straight fence. They should be measured as curved fences within Group II features in MMRW. The radius is to be considered to be the radius equal to that of the arc which passes through the posts.

2 Vehicle Parapets

The MMRW provides for two categories of curvature of vehicle parapets for payment purposes. Curves which are made up from individual straight lengths of parapet should not be considered to be small lengths of straight parapet.

3 Pedestrian Guardrails, Pedestrian Guardrails and Handrails

Curves which are made up from individual straight lengths should not be considered as curved elements but as straight guardrails or handrails.

Where the rails are actually curved they should be measured as curved guardrails or handrails as described by the specific radius.

4 Materials for Standard Parapets

The materials for use in standard parapets should not normally have been designated by the Employer.
