Notes for Guidance on the Method of Measurement for Road Works Series MMNG 1100 - Kerbs, Footways and Paved Areas

CC-GMP-01100

December 2010

About TII

Transport Infrastructure Ireland (TII) is responsible for managing and improving the country's national road and light rail networks.

About TII Publications

TII maintains an online suite of technical publications, which is managed through the TII Publications website. The contents of TII Publications is clearly split into 'Standards' and 'Technical' documentation. All documentation for implementation on TII schemes is collectively referred to as TII Publications (Standards), and all other documentation within the system is collectively referred to as TII Publications (Technical). This system replaces the NRA Design Manual for Roads and Bridges (NRA DMRB) and the NRA Manual of Contract Documents for Road Works (NRA MCDRW).

Document Attributes

Each document within TII Publications has a range of attributes associated with it, which allows for efficient access and retrieval of the document from the website. These attributes are also contained on the inside cover of each current document, for reference. For migration of documents from the NRA and RPA to the new system, each current document was assigned with new outer front and rear covers. Apart from the covers, and inside cover pages, the documents contain the same information as previously within the NRA or RPA systems, including historical references such as those contained within NRA DMRB and NRA MCDRW.

Document Attributes

TII Publication Title	<i>Notes for Guidance on the Method of Measurement for Road Works Series MMNG 1100 - Kerbs, Footways and Paved Areas</i>
TII Publication Number	<i>CC-GMP-01100</i>

Activity	<i>Construction & Commissioning (CC)</i>
Stream	<i>Guidance for Measuring and Pricing (GMP)</i>
Document Number	<i>01100</i>

Document Set	<i>Standards</i>
Publication Date	<i>December 2010</i>
Historical Reference	<i>Series MMNG 1100</i>

NRA DMRB and MCDRW References

For all documents that existed within the NRA DMRB or the NRA MCDRW prior to the launch of TII Publications, the NRA document reference used previously is listed above under 'historical reference'. The TII Publication Number also shown above now supersedes this historical reference. All historical references within this document are deemed to be replaced by the TII Publication Number. For the equivalent TII Publication Number for all other historical references contained within this document, please refer to the TII Publications website.

Series 1100: Kerbs, Footways and Paved Areas

1 Steps

The measurement of steps in this Series is intended for isolated steps and landings (e.g. steps to communications cabinets in cutting slopes). The compiler should define on the drawings in the Contract the extent of the steps and landings and each complete set of steps and landings is measured individually at each individual location. Steps and landings incorporated in a structure should be measured in accordance with the appropriate Series of the MMRW.
