

## **Series 2000: Waterproofing for Structures**

### **1 Additional Protective Layers**

The Specification requires an additional protective layer, in the form of a red tinted bituminous protection, to be laid on those areas of any waterproofing system that are to be overlaid with hot rolled surfacing materials. The Drawings should show these areas and also other areas that are to be provided with other types of additional protective layers, such as a protective concrete screed. These protective layers are included in the item coverage for waterproofing and are not measured separately.
