

## Implementation of CC-PAV-04007 Specification for the Reinstatement of Openings in National Roads

May 2019

### Implementation of CC-PAV-04007 Specification for the Reinstatement of Openings in National Roads (May 2019)

CC-SPW-04007 The Specification for the Reinstatement of Openings in National Roads (CC-SPW-04007) <https://www.tiipublications.ie/document/?id=899> has been withdrawn in the May 2019 Publication. The document is replaced by CC-PAV-04007 Requirements for Reinstatement of Openings in National Roads. This document is being issued as a TII Publications (Technical) document for an interim period.

From the date of this Technical Bulletin, and until CC-PAV-04007 is issued as a TII Publications (Standards) document, this CC-PAV-04007 should be used for the reinstatement of openings in national roads.

All enquiries and comments in relation to CC-PAV-04007 can be sent by email to [infopubs@tii.ie](mailto:infopubs@tii.ie) and will be considered in any revision to the document prior to publication as a TII Publications (Standards) document.

### Changes to the Requirements for the Reinstatement of Openings in National Roads – May 19

Table 1 on the following page summarises the key changes incorporated into the May 19 publication of CC-PAV-04007 from the original requirements contained within the now withdrawn CC-SPW-04007.

## Implementation of CC-PAV-04007 Specification for the Reinstatement of Openings in National Roads

May 2019

Table 1 - Summary of Changes to CC-PAV-04007

<b>Updates</b>
The document title has been updated to ‘The Requirements for the Reinstatement of Openings in National Roads’ (CC-PAV-04007) to better reflect the document in its updated format.
The requirements have been updated to align where possible with the Department of Transport, Tourism and Sport (DTTAS) updated ‘Purple Book’ published in April 2017 titled ‘Guidelines for Managing Openings in Public Roads (Guidelines for the Opening, Backfilling and Reinstatement of Trenches in Public Roads)’.
The Notes for Guidance have now been incorporated into the main document where relevant.
The criteria where Full Lane Width Reinstatement of openings in national roads is required has been updated in Section S0.4.2. This includes reference to a ‘TII Pavement Condition Map’ to be made available on the ‘Downloads’ section of the TII Publications website.
The procedure for selecting appropriate reinstatement options for carriageways, hard shoulders, online cycle facilities, and footways and footpaths has been updated.
Requirements for reinstatement of rigid pavements are no longer included.
Additional imagery has been added to Section 6 and Section 10 for clarity.
The requirements for pavement have been updated in line with CC-SPW-00900 Specification for Road Works Series 900 - Road Pavements Bituminous Materials and the associated Standard Construction Details.
Updated references to other TII Publications and external documents, Government Departments/TII and legislation, including Health and Safety legislation.
